INSTRUCTIONS

- Copy these barcodes on to CARDSTOCK and very carefully cut them out.

- or you can print on paper, carefully cut them out, and paste to 4 separate 3x5 cards.

The most important part is the distance from the bottom of the card to the start of the barcode. This needs to be a very straight, and clean cut.

You will scan these four cards in the following sequence:

Enter - should receive two green flashes
V - should receive one green flash
A - should receive one green flash
Exit - should receive two green flashes

The Slot Readers only need to be set up once.
